HUMAN RESOURCES MANAGEMENT

Workrig, Human Resource Management software

One of the most advanced people management softwares in the market, launched under the name of Workrig. The solution is a cloud based HRMS system, with modules such as Time, Leave, Roster, Payroll, Statutory Compliance, Performance, Learning etc. With more than 200 customers already onboarded, the solution built on various frameworks of Java, with a Multitenancy architecture.

PROJECT MANAGEMENT

Taskrig, Project Management

A solution meant to be to manage, Project, Task & Timesheet Management , Billing & Receipts.

Manage your tasks, documents, milestones; bills generate a business case, all in one place. Specific profiles have specific information- Project Owner, Team Lead, Resource- their specific view of the project.

Un-complicated system on one software solution, rather than excel, outlook, doc sharing tools, charts etc. Making work a priority with lesser collaboration issues. Widely used in the IT, ITES industries, with integrations, a cloud solution built with Java.

RESOURCE MANAGEMENT

Infinity, the Resource Management tool

➔ Analysis based on historical research shows that there is a need for data flow from Project Requirements to the Recruitment module. Vice versa, the Candidate Pipeline needs to be visible to the Project Owners enabling them in better planning of Project tasks & Project resource mappings.

The solution had a particular requirement from a partner Software product company, where the solution was to be built. With research & analysis all user stories were developed & documented, and the solution developed.

EDUCATION SOFTWARE

The education sector is revolutionizing, where institutions must adapt to the change. Subtle changes introduced with dashboards and analytics on cloud, called PACE.

An online platform for the teachers to update marks, weekly tests, Independent assignments, classwork, projects and group discussions. The teachers remark registered - maps the progress of each student on a regular basis and provides remedial actions whenever required. An intelligent system, parameterised to suite the change.

REAL ESTATE CRM

Customers, Projects, Billing and Payment Schedules! These are but some functions the software covers in the process of fulfilling the basic CRM requirements of the user. Tailored to suite the Real estate market, the product has been conceived to take care of all the CRM requirements of the sector.

Starting from Enquiries, to Lead Processing, to Billing & Payment Scheduling, the software is designed to acheive automation, management and reporting.
